- Majoring in Computer Science
  - Minoring in Applied Mathematics

Interned at Charleston County School District IT - Summer 22

- Gained hands-on experience of how the things I'm currently learning are implemented in the real-world

My Webpage

About Me

I'm Trey. I'm a college student with the hope of doing something relevant, focused on keeping with the times. Every day goes by and there's more and more technological advances. I want to keep up with that new flow of knowledge by continually learning and growing, and what better place to do that than here. In my free time, I occasionally 3-D model, read, play the newest videogames, and work on personal projects.
